ministering to churches and missionaries with their computer needs

Brothers and Sisters in Christ,

In December I traveled with my daughter to a sensitive country to help set up a network and computer lab and do some videography work for some missionaries. In this country the missionaries shared the same need: Sunday School/Discipleship materials in the native language. We have the opportunity now to get the Gospel out to the world, literally. Below are some recent projects we are working on.

Current/Future projects:

Video translations of discipleship materials using Artificial Intelligence for missionaries and Bible students worldwide.

Invested in ability to translate videos into 175 different languages through Heygen (https://heygen.com).

Obtaining discipleship and Sunday School material for translation.

Assist Bible college with computer lab needed for accreditation package. Helped with network, server, and security setup. Advised with software licensing and configuration.

Assist 2 missionaries with videography work for their reports for their supporting churches.

Helped restore internet and WiFi access for local church.

Restored failed hosting service for approximately 14 websites that I support. It looks like it was malicious content.

I am looking for some audio/video translation projects to work on at no cost to missionaries and churches. Please contact me if interested!!

Thanks for your prayers and support!
