ministering to churches and missionaries with their computer needs

Brothers and Sisters in Christ,

I hope you are all doing well. We have been busy with multiple projects. Some of them have been completed but in reality when you work on someone's computers, the computers become your children and many years later you will get questions about something and need to provide support 😊 .

Completed projects:

Completed network upgrade project for Windward Baptist Church in Hawaii. Cut internet access costs in half. Simplified WiFi access. Provided central computer/user management.

Google Workspace for Education at Hawaii Baptist College. Set up 100TB of storage space and teacher/student accounts. Started recording and translating classes for future use.

Deployment of web based patching solution – capable of doing software installs/updates and vulnerability assessments.

Current/Future projects:

Working with missionary to Nepal on video translation project. Provided video translation and transcription of scripts for review by nationals in Nepal. Videos modified for translation accuracy. We have been faced with many changes by Heygen (the video translation application). Changes have severely affected quality and what we are able to do with translations.

We will be travelling to the Philippines in December this year to assist missionaries and ministries where there is a need for IT support. Please share. We are still in the planning stages. No cost to ministries. Currently we are scheduled to go to Samar and Cebu. We have time to work on other projects in other areas.

There have been several earthquakes in the Philippines recently. Please pray for the churches and ministries of those impacted in the Philippines.

Thanks for your prayers and support! May the Lord bless you in your specific endeavors to spread the Gospel to the world!
